Overview

Reliable CG Series Motorcycle

This CG series motorcycle is engineered for efficiency and durability, featuring a fuel-efficient engine that consumes just 1.9 liters per 100 kilometers. Designed for both urban commuting and general transportation, it includes a robust rear carrier for heavy loads and a full chain box to protect against mud and debris. With its classic styling, alloy wheels, and reliable braking system, this motorcycle offers a practical and cost-effective solution for professional transport needs.
