

125mm Bench Grinder for Workshop Use

This 125mm bench grinder is designed for a variety of grinding and sharpening applications. It features a robust motor, durable construction, adjustable tool rests, safety guards, and spark deflectors.

Product Overview

Professional Workshop Bench Grinder

This 125mm bench grinder is engineered for demanding workshop environments, providing reliable performance for grinding, sharpening, and deburring tasks. Built with a focus on durability and operator safety, it features a robust motor and adjustable tool rests to ensure precision during operation. It is an essential tool for garages, maintenance workshops, and fabrication projects requiring consistent material removal.

Technical Specifications

Grinding Wheel Diameter	125 mm
Primary Applications	Grinding, Sharpening, Deburring, Workshop Maintenance

Safety & Design

Safety Equipment

- Adjustable safety guards
- Spark deflectors
- Adjustable tool rests
