

12L Gravity-Fed Resin Water Filter

This gravity-fed water filter is designed for household use with a 12L capacity. It features a two-stage filtration system with a resin filter to reduce water hardness and remove certain impurities.

Overview

Gravity-Fed Filtration System

The 12L Gravity-Fed Resin Water Filter is a reliable purification solution designed for homes and offices. Utilizing a two-stage filtration process with a primary resin filter, it effectively reduces water hardness and removes impurities to enhance drinking water quality. Its durable, transparent construction allows for easy monitoring of water levels, ensuring you always know when a refill is needed.

Technical Specifications

Total Capacity	12 L
Filtration Stages	2
Filter Type	Resin Filter

Design & Build

Material	Transparent Plastic
Water Level Monitoring	Yes

Applications

Suitable Environments	Home, Office
