

12V 100Ah Sealed Lead-Acid Battery

This 12V 100Ah sealed rechargeable battery is designed for various power applications. The battery offers reliable performance and long-lasting power, suitable for use in UPS systems, solar power storage, and other demanding applications.

Overview

Reliable Energy Storage

This 12V 100Ah sealed rechargeable battery is engineered for consistent and long-lasting power delivery. Designed with a sealed construction, it offers maintenance-free operation and enhanced safety by preventing leaks. It is an ideal solution for demanding environments, including UPS systems and solar power storage setups.

Technical Specifications

Nominal Voltage	12 V
Capacity	100 Ah
Rating Condition	20HR
Certifications	CE, MH26335

Features

Key Features

- Sealed rechargeable design
- Maintenance-free operation
- Leak-proof construction
- Robust build quality

Applications

Recommended Uses

UPS Systems • Solar Power Storage • General Power Backup
