

12V 70Ah 680A Marine Starting Battery

This 12V 70Ah marine battery is designed for reliable starting power and long-lasting performance in marine applications. It features robust construction to withstand harsh marine environments and provides consistent power output for various onboard electrical systems.

Overview

High-Performance Marine Starting Power

This maintenance-free 12V marine battery is engineered for reliable starting power in demanding nautical environments. With a capacity of 70Ah and a cold cranking amperage of 680A, it ensures consistent performance for boats and yachts. Its robust construction is specifically designed to withstand harsh marine conditions, providing dependable power for essential onboard electrical systems.

Electrical Specifications

Voltage	12 V
Capacity	70 Ah
Cold Cranking Amps	680 A

Features

Maintenance Status

Maintenance-Free

Construction Features

- Robust marine-grade design
- Designed for harsh environments
- Reliable starting performance

Suitable Applications

Marine, Boat, Yacht
