Product Overview

Reliable Automotive Power

This 12V 75Ah lead-acid battery is engineered for consistent starting power and long-term reliability in automotive applications. Utilizing advanced calcium maintenance-free technology, it eliminates the need for water replenishment while ensuring enhanced durability. Designed to meet or exceed OEM specifications, this unit provides a dependable power source for a wide range of vehicles.

Technical Specifications

Voltage	12 V
Capacity	75 Ah
Technology	Calcium Maintenance-Free

Key Features

Maintenance

Maintenance-Free • Sealed Design

Performance Highlights

- Reliable starting power
- Enhanced durability
- OEM specification compliance
- Long service life
