

12V Cordless Drill Driver with Li-ion Battery

This 12V cordless drill driver is designed for various drilling and screwdriving applications. It features a high-performance motor powered by a 2AH Lithium-Ion battery.

Product Overview

Professional Cordless Performance

This 12V cordless drill driver is engineered for versatility and efficiency in professional environments. Featuring a high-performance lithium-ion battery system, it offers extended run times and a rapid one-hour charge cycle. Designed with user convenience in mind, the tool includes an integrated LED work light, a belt clip for high-altitude transport, and a quick-change chuck system to streamline your workflow.

Technical Specifications

Voltage	12 V
Battery Technology	Lithium-ion (Li-ion)
Quick Charge Time	1 hour
Gearbox	Two-speed powder metallurgy

Features

Key Features

- Built-in LED work light
- Short-circuit protection
- Battery capacity indicator
- Quick-change chuck system
- Spindle lock for easy bit changes
- Integrated belt clip

Safety & Protection	Short-circuit protection, Li-ion Safety
