

12V Lead-Acid Battery Charger

This 12V battery charger is suitable for automotive and general applications. It is designed for maintaining and recharging lead-acid batteries.

Product Overview

Professional 12V Lead-Acid Battery Charging Solution

This 12V lead-acid battery charger is engineered for reliable performance in automotive and general-purpose applications. It features a robust construction designed for durability in demanding environments and includes a convenient carrying handle for easy portability. The unit ensures efficient maintenance and recharging for lead-acid batteries, with clear terminal markings to facilitate safe and correct usage.

Technical Specifications

Voltage Rating

12 V

Output Voltage

Capacity Rating

34 AH

Battery Capacity

Key Features

Application Suitability

- Automotive Charging
- Lead-Acid Battery Maintenance
- General Purpose Power Applications

Design Features

Robust Construction, Portable Handle, Clear Terminal Markings

Portable Design

Yes
