

12V Lithium-Ion Cordless Impact Driver

This 12V lithium-ion impact driver is designed for efficiently driving screws and bolts with high torque. The tool features a lightweight construction and variable speed trigger for precise control.

Overview

Professional Performance in a Compact Form

This 12V Lithium-Ion Cordless Impact Driver is engineered for demanding fastening tasks, offering a perfect balance of power and portability. Designed with an ergonomic grip and a lightweight chassis, it minimizes user fatigue during extended operation. The advanced lithium-ion battery technology ensures consistent power delivery with minimal self-discharge, while the integrated LED lighting provides excellent visibility in constrained or dimly lit workspaces.

Technical Specifications

Voltage	12 V
Battery Technology	Lithium-Ion

Features

Key Features

- Variable speed trigger for precision
- Built-in LED work light
- Ergonomic handle design
- Memory-free battery technology

Performance Highlights

12 V
