

# 12V Portable Air Compressor with Integrated Gauge

This compact 12V air compressor is designed for inflating tires and other inflatable items. It features an integrated pressure gauge for monitoring inflation levels and is suitable for car use.

## Product Overview

### Compact Roadside Solution

This portable 12V air compressor is designed for efficient tire inflation and general-purpose pneumatic needs. Engineered for reliability during emergency roadside assistance, it features a compact form factor that ensures easy storage in vehicle trunks. With an integrated pressure gauge, users can monitor inflation levels in real-time, ensuring optimal pressure for safety and performance.

## Performance Specifications

### Maximum Pressure

**300 PSI**  
Max Pressure

### Power Source

12V DC

## Features

### Typical Applications

- Tire inflation
- Emergency roadside assistance
- Inflatable items

### Key Features

Integrated Gauge, Portable Design, Emergency Ready, 12V Operation
