

12V Portable Car Kettle

This 12V kettle is designed for heating water in vehicles using a standard 12V cigarette lighter socket. It has a 1.0L capacity and is suitable for camping, road trips, and travel.

Product Overview

Convenience on the Move

This 12V portable car kettle is an essential accessory for professional drivers, camping enthusiasts, and long-distance travelers. Designed with a generous 1000ml capacity and a rapid-heating stainless steel plate, it allows you to prepare hot beverages or instant meals directly inside your vehicle. With safety features like automatic power cut-off and high-temperature resistant materials, it offers a reliable solution for on-the-go hydration.
