

14 HP Air-Cooled Single-Cylinder Diesel Engine

This 14 HP air-cooled diesel engine features a single-cylinder design. The engine provides reliable power for generators and various industrial applications.

Overview

High-Performance Industrial Engine

This 14 HP air-cooled single-cylinder diesel engine is engineered for reliable performance in demanding industrial environments. Featuring a compact, durable design and efficient direct fuel injection, it is an ideal power source for generators, water pumps, and construction machinery. Its air-cooling system simplifies maintenance and ensures consistent operation even where space and cooling resources are limited.

Technical Specifications

Rated Power

14 HP

Horsepower

5.6 KW

Rated Power

Rated Speed

3000 RPM

Fuel Consumption Rate

0.337 L/kWh

Design & Features

Suitable Applications

- Power Generation
- Water Pumping
- Construction Machinery
- Industrial Power Tools

Engine Configuration

Single-Cylinder, Air-Cooled, Diesel, Direct Injection

Maintenance & Safety

Operational Safety

Read Manual Before Use • Diesel Fuel • Keep Away From Children
