Product Overview

REINFORCED CUTTING DISCS

FAST CUTTING ACTION AND LONG SERVICE LIFE.

Φ14" (350mm)

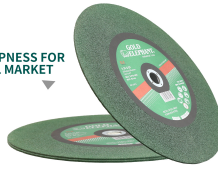

Reinforced design ensures fast cutting action and long service life for industrial operations.

Industrial Performance Cutting Wheel

This 14-inch abrasive cutting wheel is engineered for high-performance cutting across various metal and stainless steel applications. Featuring a medium-hard bond, it is designed to provide an optimal balance between fast cutting efficiency and extended disc service life. The wheel is constructed with premium abrasive materials, making it a reliable choice for demanding industrial environments requiring clean, precise cuts.

Technical Specifications

BEST SHARPNESS FOR
INDIVIDUAL MARKET

General purpose disc for all metal, stainless steel cutting application
Made of precious corundum, and added green filler to increase sharpness of disc; ideal for stainless steel purpose.
Medium hard bond. For an optimal ratio between cutting performance and disc life.

Constructed with premium corundum and green filler for enhanced sharpness and balanced disc life.

Dimensions

350 mm

Diameter

3 mm

Thickness

25.4 mm

Bore Size

Performance Limits

4400 RPM

Max RPM

80 m/s

Max Speed

Wheel Type

T41 Flat Wheel

Compliance & Quality

Certifications

ISO 9001, MPA Certified, EN 12413

Application

APPLICATION

Applied to various kinds of stainless steel and metal

Engineered for high-efficiency cutting across diverse metal and stainless steel applications.

Compatible Materials

- Stainless Steel
- Metal
- Steel
- Inox
