

14-Inch CRT Color Television

This color television utilizes a cathode ray tube (CRT) to display images on its 14-inch screen. The unit features integrated speakers on both sides and includes front-facing audio/video input jacks.

Product Overview

Classic CRT Viewing Experience

This 14-inch cathode ray tube (CRT) color television offers a reliable solution for standard definition viewing needs. Featuring a traditional 4:3 aspect ratio, the unit is built for straightforward operation and compatibility with legacy media devices. Its compact design includes integrated side-firing speakers and convenient front-facing input jacks for quick connectivity.
