

1400W Reciprocating Saw for Wood, Metal, and Plastic

This 1400W reciprocating saw is designed for cutting through various materials including wood, metal, and plastic. It has a robust motor that provides high cutting speeds for efficient and precise cuts.

Overview

High-Performance Reciprocating Saw

This 1400W reciprocating saw is engineered for demanding cutting tasks across wood, metal, and plastic. Featuring a robust motor and advanced vibration-dampening technology, it ensures both high-speed performance and reduced operator fatigue. Designed for efficiency, the tool includes a tool-free blade change system and an adjustable shoe to optimize cutting depth and angle for various professional applications.

Technical Specifications

Power Output

1400 W

Rated Power

Compatible Materials

Wood, Metal, Plastic

Features

Key Features

- Tool-free blade change system
- Vibration-dampening mechanism
- Adjustable cutting shoe
- Ergonomic handle design

Applications

Common Applications

Demolition • Pipe Cutting • General Construction
