Product Overview

Multi-functional cooking including roasting, grilling, and oil-free frying.

Versatile cooking modes for chicken, pizza, steak, and more.

Professional 14.5L Multi-Function Air Fryer

This high-capacity 14.5L air fryer is designed for efficient, professional-grade cooking in household environments. Featuring a dual-heating system with top convection and a 360-degree rotation function, it cooks up to 20% faster than traditional methods while ensuring even heat distribution. The unit is built with a durable stainless steel housing, a double-tempered glass viewing window, and an intuitive control interface with stepless rotary knobs for precise temperature and time management.
