

149cc Motorcycle Engine

This CG150-class engine is a robust and reliable single-cylinder, four-stroke engine designed for motorcycles. The air-cooled engine has a 149cc displacement, providing a balance of power and fuel efficiency.

Overview

Robust 149cc Motorcycle Engine

The CG150 engine is a robust and reliable single-cylinder, four-stroke engine designed for motorcycles. This air-cooled unit delivers an optimal balance of power and fuel efficiency, making it suitable for various motorcycle applications. With its durable construction and straightforward design, it ensures consistent performance for professional use.

Technical Specifications

Cooling System

Air-cooled

Displacement

149 cc

Engine Type

Single-cylinder, four-stroke

Fuel System

Carburetor

Ignition System

CDI (Capacitor Discharge Ignition)

Drivetrain

Clutch System

- Manual clutch
- Multi-plate wet clutch

Transmission

5-speed gearbox
