

14V 120A Automotive Alternator

This automotive alternator generates electrical power to charge the battery and supply power to electrical components. It delivers consistent output for reliable performance.

Overview

High-Performance Automotive Alternator

This automotive alternator is engineered for efficient power generation within vehicle electrical systems. Designed for durability and reliable performance, it features a robust housing and a ribbed pulley system to ensure optimal belt grip during operation. It provides consistent output voltage and current to effectively charge the battery and power essential electrical components while the engine is running.

Electrical Specifications

Performance Metrics

14 V

Compatible Platforms

FOTON, HOWO, JAC

Design & Construction

Key Design Features

- Ribbed pulley for optimal belt grip
- Robust housing for enhanced durability
- Integrated voltage regulation
- Efficient power conversion components
