

15-28 HP Single Cylinder Diesel Engine

This single-cylinder diesel engine is designed for power generation and various industrial applications. It delivers between 15 and 28 horsepower and features a robust construction for durability and long service life.

Overview

High-Performance Diesel Power

This robust single-cylinder diesel engine is engineered for versatile industrial applications and reliable power generation. Designed to deliver consistent output between 15 and 28 horsepower, it ensures durability even in demanding operational environments. The unit features an optimized cooling and fuel injection system to maintain efficiency and ease of maintenance over its long service life.

Performance

Rated Power Output

15 HP

Minimum Power

28 HP

Maximum Power

Technical Details

Core Systems

- Advanced air intake with filtration
- Precision fuel injection system
- Integrated cooling system
- Heavy-duty exhaust system

Configuration

Single-Cylinder, Diesel-Powered, Industrial Grade

Compliance

Certifications

ISO 9001:2000
