Overview

High-Performance Gasoline Water Pump

This 1.5-inch gasoline-powered water pump is a portable and efficient solution designed for versatile water transfer needs in agriculture, landscaping, and construction. Powered by a reliable 4-stroke OHV gasoline engine, it offers high-volume water displacement with a maximum head of 24 meters. Its compact, durable construction ensures easy transportation and stability, making it an ideal choice for both professional and residential water management tasks.

Technical Specifications

Engine Type	4-stroke OHV gasoline engine
Engine Displacement	98 cc
Discharge Port Diameter	40 mm
Maximum Head	24 m
Self-Priming Time	55s per 4m

Certifications

Certifications & Standards

CE • EMC • EU-V • CARB Certified

Features

Key Features

- Compact and stable structure
- High-precision machining
- High-effective mechanical seal
- Easy to start
- Lightweight for easy transport

Applications

Suitable Applications

Agriculture, Landscaping, Construction, Dewatering, Emergency Water Removal
