

1.5 Ton Hydraulic Mini Dumper

This 1.5 ton hydraulic mini dumper is engineered for efficient material handling, even in confined spaces. The dumper features a robust hydraulic system and a compact chassis for optimal maneuverability and dumping.

Overview

Compact Powerhouse for Material Handling

The 1.5 Ton Hydraulic Mini Dumper is a robust and efficient solution designed for material transport in confined spaces. Featuring a powerful hydraulic tipping system and a durable steel chassis, it is built to handle demanding construction, landscaping, and agricultural tasks. Its compact footprint and high maneuverability ensure productivity even in tight working environments.

Performance Metrics

Payload Capacity

1500 Kg

Payload

0.75 m3

Bucket Capacity

Operating Capabilities

22 km/h

Max Speed

21 %

Grade Ability

Engine and Drive

Engine Specifications

- Model: S1100BNM
- Type: Horizontal single-cylinder, four-stroke
- Cooling: Radiator water-cooled
- Rated Power: 11kW @ 2200rpm
- Starting: Electric start

Drive Configuration

4x2

Dimensions and Weight

Overall Dimensions

2795 x 1600 x 2060 mm

Machine Weight

1250 Kg

Min. Turning Radius

< 4m

Features

Standard Features

Hydraulic Tipping Hopper, Electric Start, Steel Driver Shield, Full Engine Casing, Ergonomic Seat

Logistics

Container Loading	6 units per 20ft container (2 decks)
HS Code	843050900
