

1500 RPM 3 HP AC Electric Motor

This three-phase asynchronous motor provides reliable power for industrial applications. It features a 100 frame size and complies with IEC standards for performance and mounting.

Overview

High-Performance YE2 Series Motor

This YE2 series three-phase asynchronous motor is engineered for reliable industrial performance. Built with 100% copper wiring for enhanced durability, it meets rigorous international standards including CE and CCC certifications. The unit is designed for versatility, supporting multiple mounting configurations and offering efficient, consistent power delivery for demanding applications.

Technical Specifications

Efficiency Standards

IE1 • IE2

Motor Type	Three-phase asynchronous
Frame Size	100
Mounting Options	B3, B5, B35, B14, B34

Compliance & Quality

Certifications	CCC, CE, ISO 9001:2015, GB/T 19001-2006

Construction

Construction Materials

- 100% Copper wire windings
- Robust housing
- Integrated cooling fins
