

1.5L Electric Kettle with 360° Rotational Base

This electric kettle has a 1.5L capacity and a split-type base for ease of use. It features 360-degree rotation, a heating lamp, and automatic overheat disconnect protection.

Overview

Efficient Boiling Solution

This 1.5L electric kettle is designed for efficiency and safety in any professional or kitchen environment. Featuring a high-power 1500W heating element, it ensures rapid boiling times. The split-type, 360-degree rotational base offers convenient handling, while advanced safety features like automatic overheat protection and auto-shutoff provide peace of mind during daily operation.
