Overview

High-Performance Crawler Bulldozer

The 160 HP crawler bulldozer is engineered for superior power, reliability, and an extended service life in demanding work environments. Featuring advanced hydraulics and an optimized design, it delivers strong torque output and efficient fuel consumption. The reinforced hexahedral cab ensures excellent visibility and operator comfort, making this machine a dependable choice for road building, land clearing, and site preparation projects.

Engine Power

Technical Characteristics

Engine & Control Highlights

- High power reserve with strong torque output
- Low fuel consumption for operational efficiency
- Reliable hydraulic control system
- Automatic speed change mechanism
- Shift gears without stopping the vehicle

Transmission Technology

3 elements, single stage and single phase torque convertor

Operator Environment

Cabin Features

Hexahedral design, Outstanding visibility, High-tightness sealing
