

# 165-Degree Concealed Cabinet Hinge

This cabinet hinge is constructed from cold-rolled steel. It offers an opening angle of 165 degrees, suitable for wide-opening cabinet doors.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Concealed Hinge

This versatile 165-degree concealed cabinet hinge is engineered for smooth operation and durability in furniture and cabinetry applications. Designed with a standard 35mm cup diameter, it accommodates door thicknesses ranging from 12mm to 32mm. The hinge features an advanced multi-layer finish process, including brass and nickel plating, to ensure superior rust resistance and long-term reliability.
