

165HP Bulldozer for Earthmoving

This bulldozer is a heavy construction machine used for pushing large quantities of material. It features a large metal blade mounted on the front and caterpillar tracks for stability.

Overview

High-Performance Earthmoving Solution

This 165HP bulldozer is engineered for heavy-duty construction and earthmoving tasks, offering robust performance in demanding environments. Featuring a high-capacity front-mounted blade and durable caterpillar tracks, it provides exceptional traction and stability on uneven terrain. Designed for efficiency and power, this machine is an ideal choice for large-scale site preparation, soil displacement, and material handling.

Performance

Flywheel Horsepower

165 HP

Flywheel Horsepower

122 kW

Flywheel Power

Model Number

PD165Y-1

Design & Features

Propulsion System

Caterpillar Tracks

Application

Earthmoving, Construction, Site Preparation
