

18-Inch High-Velocity Floor Fan

This high-velocity floor fan features an 18-inch blade for substantial airflow in residential or commercial spaces. Constructed with a durable metal frame, it offers a multi-speed motor and adjustable tilt for directional airflow control.

Overview

High-Velocity Air Circulation

The 18-inch high-velocity floor fan is engineered for powerful air movement in both residential and demanding commercial environments. Featuring a durable metal frame and blade housing, this unit is built for long-lasting performance in garages, workshops, and living spaces. Users can easily customize their cooling experience with the multi-speed motor and adjustable tilt functionality, ensuring precise directional airflow control.
