

180K BTU Outdoor Tankless Gas Water Heater

This outdoor tankless gas water heater provides a continuous supply of hot water without the need for a storage tank. It features electronic ignition, safety shut-off, and precise temperature control for efficient and reliable performance.

Overview

High-Performance Outdoor Heating

This 180,000 BTU outdoor tankless gas water heater is engineered to provide an endless, on-demand supply of hot water for residential or commercial applications. Designed for external installation, this unit eliminates the need for bulky storage tanks while offering a compact, space-saving footprint. It features advanced computerized safety systems and precise temperature control, ensuring reliable and energy-efficient operation in various outdoor environments.
