

196cc Gasoline Engine with OHV

This 196cc gasoline engine is designed for a variety of applications. It utilizes an overhead valve (OHV) design to ensure improved efficiency and performance.

Overview

High-Performance 196cc Engine

This 196cc gasoline engine is engineered with an Overhead Valve (OHV) design, ensuring superior efficiency and consistent performance. Built for reliability in demanding operational environments, it serves as a versatile power source for various equipment. Its robust construction makes it an ideal choice for applications ranging from generators to landscaping machinery.

Technical Specifications

Displacement	196 cc
Engine Design	OHV (Overhead Valve)

Applications

Common Applications

- Lawn mowers
- Generators
- Small machinery

Safety

Safety Warnings	High Temperature Surface
