

2-Cylinder Diesel Engine, 11.3-22kW

This high-performance 2-cylinder diesel engine is designed for industrial applications. It delivers between 11.3kW and 22kW of power and is suitable for generators, pumps, and other power-driven systems.

Overview

High-Performance 2-Cylinder Diesel Engine

This versatile 2-cylinder diesel engine is engineered for demanding industrial and agricultural applications, delivering a power output range of 11.3kW to 22kW. Designed with a robust 4-stroke, water-cooled architecture, it offers reliable performance for machinery such as tractors, water pumps, and generators. Its durable construction ensures long-term efficiency and ease of maintenance in diverse working environments.

Performance Metrics

Rated Power Output

11.3 kW
Min Power

22 kW
Max Power

Maximum Torque

120 N.m

Technical Specifications

Bore Options

- 75
- 80
- 85
- 90
- 95
- 100
- 105

Available Models

275 • 280 • 285 • 290 • 295 • 2100 • 2105

Engine Type

Water-cooled, 4-stroke, I.D.I or D.I.

Total Displacement

0.7 - 2.25 L

Starting Method

Electric starting

Net Weight

140 - 330 kg

Applications

Suitable Applications

Tractor, Water pump, Marine set, Generator, Agricultural truck, Engineering machinery
