

# 2-in-1 Convection Radiant Space Heater

This 2-in-1 heater combines convection and radiant heating for efficient warmth. It is designed with an adjustable thermostat and safety features for supplemental heating in various indoor spaces.

## ADDITIONAL IMAGES

## Product Overview

### Dual-Technology Heating Solution

This 2-in-1 space heater utilizes a hybrid approach, combining convection and radiant heating technologies to provide efficient and versatile warmth. Designed for supplemental heating in homes and offices, it features a compact, free-standing form factor that allows for easy portability. With adjustable thermostat settings and multiple heat levels, it offers precise control for maintaining a comfortable indoor environment.

## Technical Specifications

### Power Output

**1500 W**  
Rated Power

Model Number	ZL-040
Heating Element Type	Carbon Fibre Quartz

## Features & Controls

Heat Settings	2
Thermostat	Adjustable
Safety Features	Overheat Protection, Tip-over Switch

## Design & Build

Design	Free Standing
Color Options	Available in all colors
