Product Overview

High-Efficiency Water Management

This 2-inch clean water pump is engineered for professional water transfer tasks including irrigation and construction site drainage. Powered by a robust 196cc engine, it delivers high flow capacity with improved power efficiency and reduced vibration. Designed for durability and ease of maintenance, this unit provides a reliable solution for demanding water removal requirements.

Technical Specifications

Engine Displacement	196 cc
Inlet/Outlet Diameter	2 inch

Operational Highlights

Core Benefits

- High flow capacity and efficiency
- Compact and lightweight design for portability
- Low vibration operation
- Simplified maintenance structure
- Strengthened frame construction

Recommended Applications

Irrigation, Construction Sites, Water Removal
