

2-Inch Earth Auger for 7/8-Inch Shaft Powerheads

This earth auger is constructed from steel and designed to fit all Gardentrax powerheads with a 7/8-inch shaft. It is suitable for planting trees, gardening, and large fencing projects.

Product Overview

Robust Earth Boring Solution

This 2-inch diameter earth auger is engineered for efficient soil penetration, making it an ideal tool for planting bulbs, seedlings, or installing small posts. Constructed from heavy-duty steel with a durable finish, it features a spiral design that effectively removes soil while boring to minimize manual effort. Designed for compatibility with standard 7/8-inch shaft powerheads, this tool provides a reliable, long-lasting solution for both professional landscaping and gardening projects.
