

2-Inch Submersible Borehole Water Pump

This submersible borehole pump is engineered for efficient water extraction from boreholes. Constructed from durable materials, it offers long-lasting performance and corrosion resistance.

Product Overview

High-Performance Borehole Extraction

This 2-inch submersible borehole pump is engineered for efficient water extraction in narrow-diameter wells. Designed with durability and corrosion resistance in mind, it provides a reliable solution for domestic, irrigation, and industrial water supply needs. Its compact form factor ensures straightforward installation, while the motor is optimized for consistent flow, quiet operation, and minimal maintenance requirements.

Operating Limits

Max Liquid Temperature	35 °C
Max Immersion Depth	40 m
Min Well Diameter	53 mm

Safety & Installation

Installation Safety Requirements

- Professional electrical installation required
- Leakage protector control required
- Overload protector required
- Pump body must be reliably grounded
- Prohibit operation without water
- Shut off power before maintenance
