Product Overview

Industrial Magnetic Lifting Solution

This permanent magnetic lifter is designed for efficient and secure handling of steel materials in industrial environments. Utilizing high-performance neodymium magnets, it offers a robust lifting solution for various steel sheet and block applications. The device features a user-friendly design with a reliable handle mechanism, ensuring safe operation across manufacturing, construction, and warehousing sectors.

Technical Specifications

Rated Lifting Capacity

2000 kg
Rated Capacity

Dimensions (L x W x H) 52 x 30 x 31 cm

Net Weight 74 kg

Magnet Composition Neodymium Magnet

Operating Temperature Range -40°C to +80°C

Features & Compliance

Warranty	One year
Service Support	Overseas Service Center Available, Sample Accepted
Packaging	Wooden case with pallet
Color	Yellow or customized
