

20-Tooth Sprocket for #80 Chain

This sprocket is designed for use with #80 chains. It features 20 teeth for efficient power transmission.

Product Overview

Precision Engineering for Industrial Power Transmission

The 80B20 sprocket is a precision-engineered component designed specifically for #80 roller chain systems. Featuring 20 teeth, this sprocket ensures optimal power transmission and smooth operation across various mechanical assemblies. Constructed from high-quality steel, it is built to withstand demanding industrial environments and provide long-lasting durability for your machinery.

Technical Specifications

Model Designation

80B20

Number of Teeth

20

Compatible Chain Size

#80

Material

High-Quality Steel
