Product Overview

High-Performance Air Compression

This 200-liter oil-less piston air compressor is engineered to deliver clean, oil-free compressed air suitable for demanding environments like hospitals, clinics, and industrial workshops. Featuring a portable design and a mute operation system, it provides a reliable power source for pneumatic tools and air-operated equipment. Built for durability and efficiency, this unit ensures consistent performance for professional users.

Tank Capacity

200 L

Tank Capacity

Technical Specifications

Operation Type	Piston
Lubrication Style	Oil-less
Mute Operation	Yes
Voltage	220 V
Power Source	AC Power
Certifications	CE Certified
