

2000W Electric Induction Cooktop with Timer

This electric induction cooktop provides efficient and safe cooking with its 2000W power and multiple functions. It features a digital timer, five-stage firepower control, and a smart eye voltage consumption display.

Overview

High-Efficiency Induction Cooking

This 2000W induction cooktop is designed for versatility and reliability, featuring advanced technology to handle unstable power conditions. With a wide operating voltage range and specialized low-voltage start capabilities, it remains functional even in areas with fluctuating electricity supply. The unit includes seven distinct cooking modes and precise temperature control, making it a robust solution for professional kitchen environments.

Performance

Maximum Power	2000 W
Operating Voltage	80V - 280V
Temperature Range	30°C - 300°C
Timer Duration	0 - 23 hours

Features

Available Cooking Functions

- Stir-frying
- Grilling
- Heating milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Smart Monitoring

Voltage Display, Energy Consumption Display, Low Voltage Start Technology, Digital Display

Design

Finish

Titanium-gold
