

200cc Off-Road Motorcycle

This off-road motorcycle is equipped with a 200cc engine, providing reliable power for various terrains. It features durable construction and off-road tires for excellent traction and stability.

Overview

A Proven Legend in Off-Road Performance

The 200cc off-road motorcycle has established a legendary status with 15 years of global service and over 2 million units produced. Engineered for challenging environments, it features a robust oil-cooled engine and a high-performance chassis designed for endurance. This model combines durability with rider-focused comfort, making it an ideal choice for both demanding off-road adventures and practical daily transportation.

Engine & Performance

High performance oil-cooled engine with over 2 million units in production history.

Power & Efficiency

11.5 Kw
Max Power

8000 rpm
Max Power RPM

2.1 L/100km
Fuel Consumption

Engine Configuration: 1-cylinder, 4-stroke, oil-cooled

Maximum Speed: 100 km/h

Dimensions & Capacity

Weight and Capacity

121 kg
Dry Mass

10.6 L
Fuel Capacity

Dimensions (LxWxH): 2100x810x1185 mm

Chassis & Suspension

Separate link structure swing arm for improved comfort and shock absorption.

Equipped with durable headlight and LED turn signals for high visibility.

Rugged design with an anti-slip leather seat built for extended off-road use.

Off-Road Key Features	Air-bag mono shock absorber, Aluminum alloy swing arm, LED turn signals, Anti-slip leather seat
Ground Clearance	250 mm
Seat Height	860 mm
