Product Overview

High-Performance Double Pole Switch

The Q6 series 20A double pole switch is engineered to control both live and neutral lines simultaneously, providing an enhanced safety profile for high-load applications like heaters. Featuring a high-visibility neon indicator, users can instantly verify the operational status of their connected equipment. The internal contact mechanism utilizes premium red copper coated with silver, ensuring superior electrical conductivity and durability for long-term professional use.

Electrical Specifications

Rated Current

20 A

Rated Current

250 V

Rated Voltage

Frequency

50/60Hz

Standards & Compliance

Compliance Standards

IEC 60669-1, BSEN 60669-1

Design & Features

Contact Material

Silver-coated red copper

Indicator

Yes

Terminal Configuration

Terminal Identification

Terminal Type	Label
Input	L1, N1
Output	L2, N2
