

20HP V-Twin Diesel Engine for Industrial Power

This 20HP V-twin diesel engine is designed for power generation and industrial applications. Its robust construction ensures durability and reliable performance in demanding environments.

Overview

High-Performance Industrial Power

This 20HP V-twin diesel engine is engineered for demanding industrial applications, including power generation. Its robust construction ensures long-term durability and consistent reliability in harsh environments. Equipped with essential safety and operational features like a low oil warning system and electric start, it offers both performance and ease of use for professional operators.

Technical Specifications

Rated Power

20 HP

Power Output

Engine Configuration	V-Twin Diesel
