Overview

Reliable 20kVA Diesel Power Solution

This 20kVA diesel generator set is engineered for consistent performance in industrial, commercial, and residential applications. Designed for both prime power and standby use, it features a robust heavy-duty frame and an efficient cooling system to ensure reliable operation under demanding conditions. The unit is built to meet international quality and emission standards, providing a dependable solution for your power generation needs.

Technical Specifications

Rated Power Output

20 kVA

Rated Capacity

Engine Features

- Multi-cylinder diesel engine
- Efficient fuel injection system
- Integrated oil filtration system
- Advanced cooling system with radiator and fan

Operational Features

- Sound-attenuating canopy for quiet operation
- Vibration isolation mounting
- Heavy-duty frame construction
- User-friendly control panel
