

20kW-1000kW Diesel Power Generation Unit

This high-performance diesel power generation unit is engineered for diverse applications. It provides a reliable power output ranging from 20kW to 1000kW, suitable for various industrial and commercial needs.

Overview

High-Performance Power Generation

This robust power generation unit is engineered for diverse engineering applications, providing a reliable power output ranging from 20kW to 1000kW. Designed for durability and efficiency, it ensures a consistent power supply even in demanding environments. It is an ideal solution for foreign engineering contracting and complex industrial projects requiring dependable energy.

Performance Metrics

Power Output Range

20 kW

Minimum Power

1000 kW

Maximum Power

Technical Details

Key Features

- High-performance design
- Consistent power supply
- Durable construction
- Efficiency-focused engineering

Engine Model Identifier

KTA 50-GS8

Suitable Applications

Industrial, Commercial, Engineering Contracting, Infrastructure Projects
