

2.0L Electric Air Fryer with Timer

This 2.0L electric air fryer is designed for countertop use. It features a mechanical control panel with adjustable temperature and a timer for frying, baking, grilling, and roasting.

Product Overview

Healthy Cooking with High-Speed Air Circulation

This 2.0L Electric Air Fryer utilizes advanced high-speed hot air cycling technology to reduce fat content by more than 80% compared to traditional frying methods. Designed for versatility, it allows professional and home users to fry, bake, grill, and roast with minimal oil. The compact design features intuitive mechanical controls, making it an efficient addition to any modern kitchen countertop.
