

20V Cordless Brushless Angle Grinder

Cordless angle grinder featuring a brushless motor for enhanced performance and durability. Operates on a 20V lithium-ion battery, providing ample power for various cutting and grinding tasks.

Overview

High-Performance Cordless Angle Grinder

This 20V cordless angle grinder features an advanced brushless motor designed for extended tool life, high efficiency, and low noise operation. Engineered for demanding environments, it includes comprehensive safety features such as overload, rotation-blocking, and power-off protection. The ergonomic design is complemented by a dust-proof motor structure and a removable inlet cover, ensuring reliability in construction and metalworking applications.

Technical Specifications

Voltage	20 V
Power Source	Lithium-ion
Motor Technology	Brushless
Battery Capacity	4 Ah

Features

Design & Build

- 360° angle adjustment design
- Aluminum alloy gear housing
- Dust-proof motor structure
- Removable dust-proof inlet cover

Safety Protections

Soft Start, Brake Function, Short Circuit Protection, Overload Protection, Rotation-blocking Protection
