

2.1 Channel Speaker System with Subwoofer

This 2.1 speaker system provides rich, powerful audio. The system features a robust subwoofer for deep bass and two satellite speakers for clear highs and mids.

Overview

Immersive 2.1 Audio Experience

This 2.1 channel speaker system is engineered to deliver a balanced audio experience, combining a powerful dedicated subwoofer for deep, resonant bass with two satellite speakers for crisp highs and clear mid-tones. Designed for versatility, it features multiple input options including USB, SD card, and FM radio, making it a flexible solution for home entertainment setups. Intuitive control is provided via both physical knobs and buttons on the main unit, as well as an included remote control for convenient operation.
