Product Overview

Automated Energy Management

This 24-hour mechanical programmable timer is designed for precise control of household and office electrical appliances. With its intuitive rotating dial interface, users can easily schedule daily on and off cycles, promoting energy efficiency and convenience. The robust design includes a manual override switch, allowing for flexible operation in various indoor electrical environments.

Technical Specifications

Maximum Load

3500 W

Max Power

16 A

Max Current

Rated Voltage	230V
Frequency	50 Hz

Operational Details

Cycle Type	Daily
Minimum Switching Interval	30 min
Total Segments	48

Design and Compatibility

Key Features

Manual Override Switch • Mechanical Control • Indoor Use

Standard	Schuko, European
Finish	White body with black dial plate
