

24-Inch Industrial Pedestal Fan

This industrial-grade pedestal fan delivers powerful air circulation in large spaces. The 24-inch fan head has three balanced blades and adjustable height and tilt settings for customized airflow.

Overview

High-Velocity Industrial Cooling

The 24-inch industrial pedestal fan is engineered for robust air circulation in demanding environments such as warehouses, factories, and workshops. Featuring a durable metal construction and a stable pedestal base, it ensures reliable performance and longevity. The unit offers adjustable height and tilt settings, allowing for precise airflow direction control to meet specific cooling or ventilation requirements.

Technical Specifications

Fan Diameter	24 inch
Number of Blades	3
Speed Control	Multi-speed motor
Adjustable Features	Adjustable Height, Adjustable Tilt

Safety & Construction

Safety Features

Protective wire mesh grill

Construction Material

Durable metal frame

Applications

Ideal Environments

- Warehouses
- Factories
- Workshops
- Commercial settings
