

24-Port 10/100M + 2-Port Gigabit Ethernet Switch

This high-performance switch provides a reliable and efficient solution for network connectivity. With 24 10/100Mbps ports and 2 Gigabit ports, it offers versatile connectivity options for various devices.

Product Overview

High-Performance Network Connectivity

This 26-port web-managed Ethernet switch is designed to provide reliable connectivity for small to medium-sized business environments. Featuring 24 10/100Mbps ports and 2 dedicated Gigabit uplink ports, it ensures efficient data throughput and versatile device integration. The integrated web-based management interface simplifies network configuration, monitoring, and administration for IT professionals.

Technical Specifications

Total Ports	26
10/100M Ports	24
Gigabit Uplink Ports	2
Management Type	Web Smart
Front Panel Indicators	Power, Link/Act, Speed
Model Identifier	SLS2624P
