

# 24-Port Cat6 RJ45 Patch Panel

This high-density patch panel provides a reliable solution for managing network connections. It features 24 shielded RJ45 ports, supporting Cat6 cabling standards for optimal performance and easy installation in standard 19-inch racks.

## Overview

### Professional High-Density Networking Solution

This 24-Port Cat6 RJ45 Patch Panel is engineered for high-performance network infrastructures, offering a reliable and organized connectivity solution. Designed for standard 19-inch racks, it facilitates streamlined cable management in server rooms and data centers. The shielded ports ensure optimal signal integrity, making it an essential component for demanding networking environments.

## Technical Specifications

### Shielding

Shielded

### Total Ports

24

### Cabling Standard

Cat6

### Connector Type

RJ45

## Compatibility & Installation

### Rack Compatibility

19-inch

### Port Identification

Yes

## Applications

### Recommended Environments

Data Centers, Server Rooms, Enterprise Networking
